EDUCATION

VIT Bhopal University (2022 – 2026)

B.Tech in Computer Science Engineering, CGPA: 9.13

Bhopal, Madhya Pradesh

Rajkumar College (2021-2022)

12th standard, Percentage: 95%

Raipur, Chhattisgarh

Rajkumar College (2019-2020)

10th standard, Percentage: 94%

Raipur, Chhattisgarh

PROJECTS

LoyaltyLens – Customer Churn Prediction App

(<https://github.com/riapandey05/LoyaltyLens>) | Python, TensorFlow, Streamlit, scikit-learn | Jan-Mar 2025

- Developed a **Deep Learning** model to predict customer churn using a trained **neural network** built with **TensorFlow/Keras**.
- Integrated real-time user input features including sliders, number fields, and dropdowns for dynamic prediction.
- Applied preprocessing: label-encoded gender, one-hot encoded geography, and scaled inputs using **StandardScaler**.
- Loaded trained models and preprocessing pipelines via **Pickle** for efficient inference without retraining.
- Deployed the app on **Streamlit Cloud** for public access and live interaction.

Voice-Activated Form Assistant for Secure Banking

(<https://github.com/riapandey05/Form-Assistant>) | Python, HuggingFace Transformers, scikit-learn, Regex | March-May 2025

- Led a **8-member team** to design and deploy multilingual **NLP** pipeline for secure banking form automation, reducing **manual data entry by 70%**.
- Integrated **Web Speech API** for real-time speech-to-text and translation (Hindi/Odia/English to English).
- Used **DistilBERT** to classify spoken text into entity labels (e.g., “Name”, “Amount”) based on context and semantics with **F1-score > 0.98**.
- Designed a lightweight **Regex engine** to accurately extract entity values (e.g., ₹ amounts, 10-digit phone numbers) from raw transcriptions, post-classification.
- Deployed end-to-end pipeline using Streamlit, enabling real-time voice interaction for **500+** test users during beta testing.

LSTMind – Next Word Predictor

(<https://github.com/riapandey05/LSTMind>) | Python, TensorFlow, Keras, Streamlit | May–June 2025

- Developed an **LSTM-based neural network** to predict the next word in a text sequence using Shakespeare’s *Hamlet* corpus.
- Performed text preprocessing: **tokenization**, padding, and sequence generation to prepare model-ready input.
- Designed and trained a multi-layer LSTM model with embedding and **softmax layers**; implemented early stopping to reduce overfitting.
- Built and deployed an interactive **Streamlit app** for real-time next-word prediction based on user input.

SKILLS

Technical skills : Machine Learning , Deep Learning , Natural Language Processing, C++, MySQL.

Languages : Hindi , English

CERTIFICATIONS

Complete NLP Bootcamp – *Udemy*

GfG 160 - 160 Days of Problem Solving – *GeeksForGeeks*

Graph Theory Programming – *AlgoUniversity*

EXTRA CURRICULARS

- Operations Team Member - College Music Club (2023–2024)**
 - Assisted in event planning and execution, fostering teamwork and logistical coordination.
- Inter Public School Conference (IPSC) Fests (2018–2022)**
 - Performed as a lead guitarist in 4 national-level IPSC cultural fests, showcasing musical artistry.
