EDUCATION

VIT Bhopal University (2022 – 2026)

Bhopal, Madhya Pradesh

B.Tech, Computer Science Engineering, CGPA : **9.13**

Rajkumar College (2022)

Raipur, Chhattisgarh

12th standard, Percentage : **95%**

Rajkumar College (2019-2020)

Raipur, Chhattisgarh

10th standard, Percentage : **93%**

PROJECTS

Voice-Activated Form Assistant for Secure Banking

(<https://github.com/riapandey05/Form-Assistant>) | Python, HuggingFace Transformers, scikit-learn, Regex | March-May 2025

- Designed and deployed multilingual NLP pipeline for banking form automation, reducing **manual** data entry effort significantly. Integrated **Web Speech API** for real-time speech-to-text and translation (Hindi/Odia/English to English).
- Used **DistilBERT** to classify spoken text into entity labels (e.g., “Name”, “Amount”) based on context. Designed a lightweight **Regex engine** to accurately extract entity values (e.g., ₹ amounts, 10-digit phone numbers) from raw transcriptions, post-classification.
- Deployed end-to-end pipeline using **Streamlit**, enabling real-time voice interaction for **500+** test users during beta testing with a with **F1-score > 0.98**.

LoyaltyLens – Customer Churn Prediction App

(<https://github.com/riapandey05/LoyaltyLens>) | Python, TensorFlow, Streamlit, scikit-learn | Jan-Mar 2025

- Developed a **Deep Learning** model to predict customer churn using a trained **neural network** built with **TensorFlow/Keras**. Applied preprocessing: label-encoded gender, one-hot encoded geography, and scaled inputs using **StandardScaler**.
- Integrated real-time user input features including sliders, number fields, and dropdowns for dynamic prediction and loaded trained models and preprocessing pipelines via **Pickle** for efficient inference without retraining.
- Designed a Streamlit app with real-time inputs (sliders, fields, dropdowns) and deployed it on Streamlit Cloud for interactive user predictions and deployed the app on **Streamlit Cloud** for public access and live interaction, achieving ~ **85%** accuracy on test data

LSTMind – Next Word Predictor

(<https://github.com/riapandey05/LSTMind>) | Python, TensorFlow, Keras, Streamlit | May–June 2025

- Developed an **LSTM-based neural network** to predict the next word in a text sequence using Shakespeare’s *Hamlet* corpus. Performed text preprocessing: **tokenization**, padding, and sequence generation to prepare model-ready input.
- Designed and trained a multi-layer LSTM model with embedding and **SoftMax layers**; implemented early stopping to reduce overfitting.
- Built and deployed an interactive **Streamlit app** for real-time next-word prediction based on user input.

SKILLS

Technical skills : Machine Learning , Deep Learning , Natural Language Processing, C++, MySQL.

Languages : Hindi , English

CERTIFICATIONS

Complete NLP Bootcamp – *Udemy*

Bits and Bytes of Computer Networking – *Google*

Cloud Computing – *NPTEL*

ACHIEVEMENTS

- Bagged Silver + Elite certificate in NPTEL Cloud Computing examination.
- Secured 1st position in state level and 4th position in national level SpellQuest-India examination.
- Completed 160 days of coding challenge on GeeksForGeeks.

EXTRA-CURRICULARS

Operations Team Member - College Music Club (2023–2024)

- Assisted in event planning and execution, fostering teamwork and logistical coordination.
- Performed as a lead guitarist in Thomso’24 , annual cultural fest of IIT Roorkee.
