EDUCATION

Vellore Institute of Technology (2022 – 2026)
B.Tech in Computer Science Engineering, CGPA: 9.13

Rajkumar College, Raipur (2022)
12th standard, Percentage : 95%

Rajkumar College, Raipur (2020)
10th standard, Percentage : 93%

SKILLS

Languages : C++, Python | **Technical skills** : Machine Learning, Deep Learning, Natural Language Processing, LLMs, Generative AI | **Libraries & Frameworks** : Matplotlib, Seaborn, Numpy, Pandas, Scikit-Learn, TensorFlow, PyTorch, LangChain, Hugging Face. **Database** : MySQL, Vector DBs.

PROJECTS

Voice-Activated Form Assistant for Banking

- 🐙 [Github/VAFA](https://github.com/riapandey05/VAFA) | *Python, HuggingFace Transformers, sklearn, Regex* Mar–May 2025
- Designed a multilingual NLP pipeline for banking form automation, reducing manual data entry effort significantly. Integrated Web Speech API for real-time speech-to-text and translation (Hindi/Odia/English to English).
 - Used DistilBERT to classify spoken text into entity labels (e.g., "Name", "Amount") based on context. Prepared a lightweight Regex engine to accurately extract entity values (e.g., amounts, 10-digit phone numbers) from raw transcriptions, post-classification.
 - Engineered end-to-end pipeline using Streamlit, enabling real-time voice interaction for 500+ test users during beta testing with a F1-score > 0.98.

ConversoAI – Chatbot With Conversation Memory

- 🐙 [Github/ConversoAI](https://github.com/riapandey05/ConversoAI) | *Python, LangChain, HuggingFace, Streamlit* Oct–Nov 2025
- Trained an intelligent chatbot system using LangChain that maintains long-term conversation history, enabling context-aware and human-like multi-turn interactions.
 - Integrated Hugging Face LLMs with ConversationBufferMemory, reducing repetitive responses by 30% and enabling dynamic, personalized dialogue handling.
 - Developed a VectorStore retriever module using embeddings for storing past messages, enabling retrieval-augmented responses and improved conversational accuracy.

GreenGuard – Forest Fire Predictor

- 🐙 [Github/GreenGuard](https://github.com/riapandey05/GreenGuard) | *Python, Scikit-Learn, Random Forest, Streamlit* May–June 2025
- Built a Random Forest-based classification system to predict the probability of forest fire occurrence using three key environmental parameters: humidity, temperature, and oxygen levels.
 - Performed data preprocessing, feature scaling, and model evaluation (accuracy, confusion matrix) to select optimal hyperparameters and ensure robust performance on unseen data with 90% accuracy.
 - Deployed an interactive Streamlit web app where users input real-time humidity, temperature, and oxygen level to obtain fire risk probability scores and actionable insights for early prevention.

COURSEWORKS

- Complete Data Science, ML, NLP, DL Bootcamp (Udemy)** – Learned supervised/unsupervised ML, data preprocessing, model evaluation, NLP pipelines, and building deep learning models with TensorFlow/Keras.
- Generative AI Bootcamp (LangChain & Hugging Face)** – Gained experience with LLM pipelines, prompt engineering, vector databases, and deploying end-to-end GenAI applications.

ACHIEVEMENTS

- Secured a 120th rank (top 5%) among 2000+ teams in the Zelestra x AWS ML Ascend Challenge.
- Secured 1st position in State level and 4th position in National level in all India Spell-Quest competition.
- Completed 160 days of coding challenge on GeeksForGeeks.

EXTRA-CURRICULARS

Operations Team Member - College Music Club (2023–2024)

- Assisted in event planning and execution, fostering teamwork and logistical coordination.
- Bagged exceptional performance award at Swaranjali'22, all India IPSC music fest.
- Performed as a lead guitarist in Thomso'24, annual cultural fest of IIT Roorkee.
